

EPC Project Manager

Advance your career at Agilitas Energy, the largest developer, builder, owner and operator of distributed energy storage and solar PV systems in the northeastern U.S.

The EPC Project Manager is an integral member of the Agilitas Energy EPC project team. The position is responsible for leading and managing all aspects of a project including stakeholder expectations, costs, schedule, project controls, reporting and project team during the projects' EPC phase. The EPC Project Manager works closely with our engineers and construction site managers and collaborates with the company's Development and Finance teams cross-functionally, to oversee and deliver the successful design and build of our energy assets.

The successful candidate is expected to bring a proven track record of 3+ years of project management experience in the field of solar and/or energy storage design-build construction.

Scope of Responsibilities (include but not limited to):

- Collaborate with project team to determine project specifications
- Work with the engineering team to ensure project designs meet or exceed internal and/or external requirements
- Assist in the development of project EPC budgets & cost estimates
- Work with vendors and subcontractors to obtain best pricing & terms.
- Draft & negotiate subcontracts and scope of work documents
- Develop and maintain project EPC schedules and timelines
- Manage prime contract & subcontract requirements
- Work with Construction Site Managers to oversee subcontractor productivity and performance
- Manage project budgets, cash flows and cost reporting
- Evaluate project progress and prepare detailed reports
- Create and maintain project documentation

Candidate Requirements:

- Bachelor's degree required. Project/Construction Management focus is a plus

- 3 to 5 years of Project Management experience; solar and/or energy storage experience preferred
- Proficiency in software related to construction/project management (specifically Microsoft Project and Excel)
- Excellent verbal and written communication skills
- Ability to read and comprehend construction plans, details, and specifications
- Experience with design-build commercial or industrial construction projects and contracts
- Conflict resolution experience
- Experience negotiating and managing contracts & subcontracts
- Knowledge of Building and Electrical codes
- Detail oriented
- Strong work ethic

Position Compensation:

Agilitas Energy's employee benefits include (but are not limited to):

- Competitive Salary and bonus potential
- Comprehensive health, vision, and dental insurance
- Health Savings and Flex Spending Account eligibility
- 401k Plan eligibility
- Employee Assistance Program
- Access to Group Life and Personal Accident Insurance
- Access to Short & Long-Term Disability Insurance

Please send resume and cover letter to: btobin@tobinconnex.com

About Agilitas Energy:

Agilitas Energy is the largest integrated distributed solar and energy storage developer and owner / operator in the Northeast U.S. The Company is an expert in the full cycle of development, construction, and distribution of large-scale distributed energy projects. The Agilitas Energy team has developed and/or built over 450 megawatts of solar PV systems collectively since 2014 and is currently developing and constructing more than 300 megawatts of solar and energy storage projects throughout the Northeast. The Company also owns and operates several standalone energy storage systems in Maine.
