

Project Developer

Advance your career at Agilitas Energy, the leading renewables and energy storage company with a mission to accelerate the transition to clean energy.

The Project Developer is a key member of the development team and will be responsible for all aspects of project development from origination to turning over a fully construction-ready project to the construction team. The Project Developer will lead site control, interconnection, project design optimization, revenue stacking, and permitting work for standalone energy storage and solar coupled with storage projects. The Project Developer will be the primary point of contact for all project stakeholders and will work cross-functionally with the Agilitas team and external parties to ensure project success. They will assist with project and portfolio-level diligence requirements for acquisitions and for finance partners.

This is an externally facing position that will require excellent communication skills and the ability to work with many different stakeholders.

Scope of Responsibilities (including without limitation):

- Fully entitle assigned projects with all permits and approvals required for construction and operation
- Gain and maintain site control for assigned projects
- Work closely with the interconnection engineering team to optimize interconnection design and obtain interconnection agreements for each assigned project
- Work with the Agilitas team and external stakeholders to optimize project design and operating strategy
- Serve as the primary point of contact for all external stakeholders for each assigned project
- Work with the Agilitas team to improve project financials, refine project financial models, and help with financial due diligence activities
- Conduct diligence on projects as part of an acquisition process
- Create and maximize value across all assigned projects

Candidate Requirements:

- Minimum Bachelor's degree, Business or Engineering preferred
- 5 years proven track record in solar/energy storage development

- Understanding of all facets of the solar/energy storage project development process
- Excellent time and workload management skills
- Strong communication skills with ability to deliver creative solutions to all stakeholders
- Self-driven, highly motivated, and able to work with minimal supervision
- Ability to multi-task and manage numerous projects simultaneously
- High degree of attention to detail and follow-through
- Strong work ethic
- Proficiency in financial models
- In-depth knowledge of ISO-NE, NYISO, PJM, and/or state-level markets for generation and storage are a plus

Position Compensation:

- Competitive Salary and bonus potential
- Comprehensive health, vision, and dental insurance.
- Health Savings and Flex Spending Account eligibility
- 401k Plan
- Employee Assistance Program
- Access to Group Life and Personal Accident Insurance
- Access to Short- and Long-Term Disability Insurance
